

BOOSALIS SHOOTING RANGE

The Helen Boosalis Park Indoor Range provides Lincoln and NE with an easily accessible public facilities, modern equipment, and quality instruction to encourage family participation and fellowship in shooting sports. Given the unique nature of the end use of this facility the Cheever team was challenged with specifications compliancy, equipment acquisitions and installation.

It includes a 25-yard indoor firearm range, automated target retrieval system, and viewing glass spectator area. The 25-meter indoor archery range offers bullseye targets, 3-D targets and crossbow targets, featuring 32 shooting lanes with large spectator area. Multimedia center for web based education, digital viewing and communication along with office space. Special consideration was given to the HVAC system to ensure a user safe environment. Exterior modifications to the existing outdoor range were made as well.
